LES CORNICHES à larmier

Les corniches avec larmier intégré sont une alliance de rondeur et de graphisme géométrique. Elles font partie des corniches au style marqué. Constituées d'arrêtes vives et droites, ces fabrications permettent de créer de l'ombre à l'arrière et ainsi de marquer le volume de la corniche.

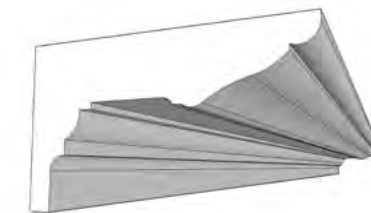

Drip CORNICHES

Cornices with embedded drips meld curves with geometric graphic design. Drip cornices are amongst those cornices with the most pronounced styles. Formed of sharp, straight edges, these pieces create shadows at the back, making the volume of the cornice stand out.

Cornices with cavettos have a concave shape that rounds out ceiling lines. With a smoother finish than drip cornices, cavetto cornices add an antique look to interior design projects.

LES CORNICHES contemporaines

De ligne épurée, les corniches contemporaines magnifient les lignes droites. Souvent en effet escalier, elles sont dépourvues d'artifices et d'ornements en staff classique.

Contemporary CORNICES

The clean lines of contemporary cornices magnify a room's linearity. Frequently designed in the form of stairs, they are stripped of the ostentation and ornamentation of classic fibrous plaster.
